

Document Exchange can help improve HEDIS Score

Health plans rely on HEDIS scores to measure and improve the quality of care they deliver, but collecting accurate, timely data for quality reporting can be a challenge. NaviNet Document Exchange can simplify this process, with the aim of helping you to achieve higher scores and better health outcomes for members.

HOW CAN DOCUMENT EXCHANGE HELP?

NaviNet Document Exchange can help health plans to improve their HEDIS-related performance.

- **Timely Data Collection:** Get the latest healthcare data from providers quickly and easily, ensuring accurate reporting within critical timeframes.
- **Data Accuracy & Completeness:** Streamline document exchange to minimize errors and omissions, maximizing the reliability of your HEDIS data.
- **Real-Time Updates:** Request and process crucial information like medication adherence and preventive screenings, enabling proactive interventions.
- **Enhanced Care Coordination:** Improve communication between providers and payers, with the goal of better-coordinated care and positive impacts on HEDIS measures.
- **Performance Monitoring:** Track provider performance effectively, identifying areas for improvement and driving positive change.
- **Quality Improvement Initiatives:** Identify gaps in care and collaborate with providers on targeted initiatives to assist in achieving higher HEDIS scores.
- **Turn-Key Solution:** Enjoy a smooth setup with user-friendly portals for both your team and providers, simplifying adoption and use.
- **Seamless Integration:** Integrate data effortlessly with your back-end systems through API and FTP connections, ensuring accessibility within your workflows.

ADDRESS PROVIDER CHALLENGES:

- **NaviNet Document Exchange**, can streamline processes, making it easy for providers to respond to requests and share data effortlessly.
- **Focus on Preventive Care:** Empower providers to prioritize preventive screenings by reminding them about requirements and collecting results efficiently.
- **Incentivize Value-Based Care:** Support value-based care models by sharing HEDIS reports, highlighting achievements and areas for improvement to encourage better performance.

CONCLUSION:

NaviNet Document Exchange can help health plans achieve higher HEDIS scores, deliver better quality care, and improve member health outcomes. Contact us today to learn how we can help you succeed.
