

Eviti Connect[®] for Oncology

Align Quality Oncology Care with
Appropriate Reimbursement

DATA SHEET

Payers and providers spend a substantial amount of time and resources managing authorizations for oncology treatments. In fact, authorizations are among the most manual and costly administrative transactions for both payers and providers. Medical guidelines for oncology treatments are complex, non-standard, and quickly compound across health plans.

Eviti Connect for Oncology brings together advanced technology and clinical expertise to empower payers and providers to deliver timely, high-value care, streamline workflows, and improve outcomes for every patient.

THE SOLUTION

Eviti Connect is a web-based healthcare payer solution that electronically connects health plans and oncology practices for the authorization of oncology treatments.

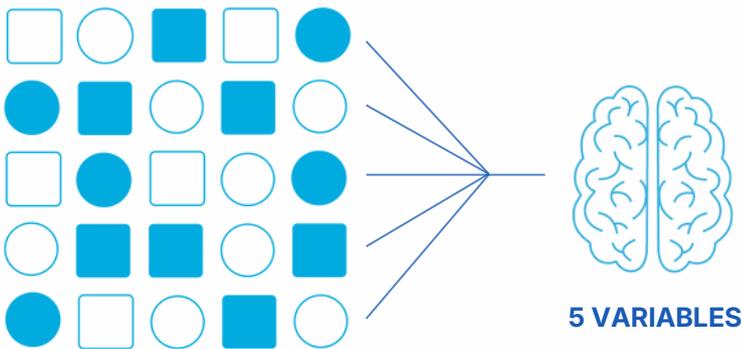

It validates treatment plans in real-time, reducing administrative burden, minimizing denials and appeals, and expediting care for patients.

KEY FEATURES

The Eviti Library covers over 4,600 up-to-date, evidence-based treatment regimens and over 9,500 federally registered clinical trials.

- Intelligent, electronic authorizations minimize delays and ensure cost-effective care.
- Integrated medical policies and regimen preferences provide transparent, actionable insights for providers.
- Real-time access to Eviti’s extensive evidence-based library, curated by expert oncologists and informatics professionals, supports informed, personalized treatment decisions.

BIOMARKERS

Capacity versus complexity.

The upsurge in data available for medical decision making threatens to overwhelm human cognitive capacity (maximum five variables per decision).

KEY BENEFITS

Eviti Connect brings payers and providers together at the point of care to authorize oncology treatment plans in real-time, aligning high quality care with appropriate reimbursement.

- Realize savings through cost avoidance—health plans pay for evidence-based, proven care tailored to each member’s diagnosis.

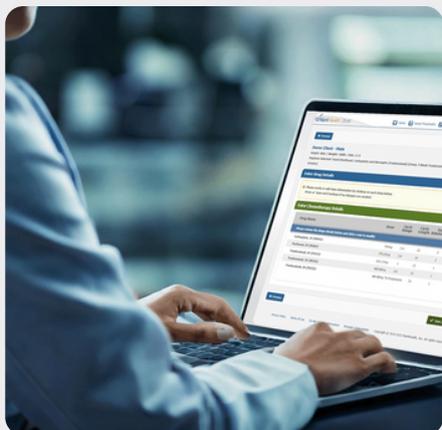

- Streamline workflows and empower staff to focus on patient care, not paperwork.

- Expedite treatment and reduce patient wait times, supporting better outcomes and satisfaction.

- Optimize provider adoption with seamless integration and broad network reach.

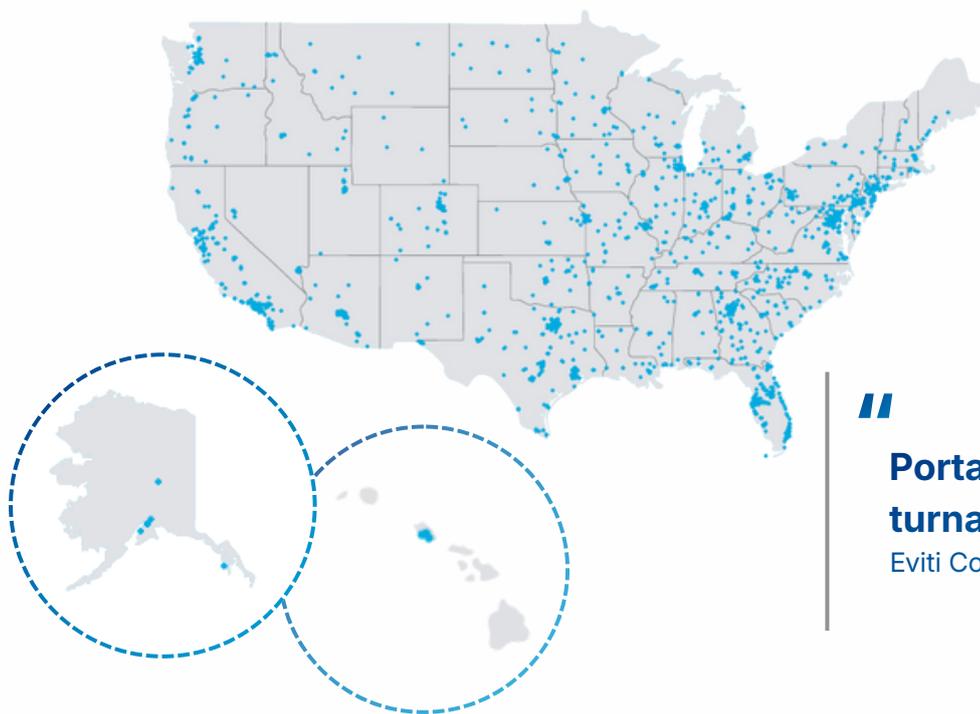

GETTING STARTED

Eviti Connect is an online application that requires no installation or maintenance by physicians or practice staff. It integrates seamlessly with Eviti Advisor, a web-based, oncological clinical decision support platform that allows clinicians to review treatment options and select a clinically appropriate treatment that optimizes clinical outcomes. Eviti Connect is trusted by oncology professionals nationwide to deliver advanced, patient-focused cancer care.

PROVIDER ADOPTION

Over **8,100 practices across the United States** have registered in Eviti Connect to authorize treatment.

“

**Portal is easy and quick
turnaround time.”**

Eviti Connect Provider User

Eviti Connect is an intelligent treatment plan validation platform that combines advanced technology with clinical expertise, empowering providers and payers to confidently prescribe and reimburse high-quality, high-value care.
