

Transforming Cancer Care

Comprehensive, up-to-date digital library of evidence-based treatment regimens and cancer research for informed treatment decisions

4,600+

Evidence-based treatment regimens cover all cancers and cancer subtypes

9,500+

Active, federally-registered clinical trials

EACH REGIMEN IN THE LIBRARY SHOWS:

TREATMENT COSTS

EXPECTED CLINICAL OUTCOMES

EFFICACY

TOXICITIES

MINIMUM REQUIREMENTS FOR INCLUSION IN THE LIBRARY

Every regimen in the Eviti Library meets rigorous inclusion criteria, ensuring recommendations are clinically sound, ethically responsible, and aligned with the highest standards of care.

The treatment must be recommended by one of the nationally/internationally recognized oncology consensus group organizations.

Data from the supporting clinical trial must be available. For recommendation or endorsed treatments that do not have diagnosis-specific clinical trial support, data may be extrapolated from closely related clinical studies.

Each individual drug within the regimen must be FDA approved for marketing in the US for the specific indication at issue, meaning the drugs are not experimental.

Eviti Connect is an intelligent treatment plan validation platform that combines advanced technology with clinical expertise, empowering providers and payers to confidently prescribe and reimburse high-quality, high-value care.
