

# Maryland Physicians Care

Maryland Physicians Care Employs NantHealth's Eviti Connect® to Enable High-Quality, High-Value Oncology Care

## BACKGROUND

Founded in 1996, Maryland Physicians Care (MPC) is a values-driven, community-focused managed care organization owned by Meritus Health, Western Maryland Health System, Holy Cross Health and St. Agnes Hospital. MPC manages the health care services provided to Maryland's Health Choice enrollees with the mission of improving the health status of its members through effective care management systems and offers recipients several benefits and services at no cost.

## CHALLENGE

MPC recognized the need for systems support to improve the operational workflows in its organization in order to better streamline oncology authorization operations and boost efficiency. Their preferred solution needed to offer their network a transparent, comprehensive database and actionable treatment data accessibility in real-time.

## SOLUTION

NantHealth's Eviti Connect payer-provider solution eliminates unwarranted variability in care through the application of nationally-accepted treatment standards at the moment of clinical prescribing.

MPC chose NantHealth's Eviti Connect to assure appropriate reimbursement by gaining visibility into the cost of care at the regimen level before member treatment begins. Through validating treatment recommendations with evidence-based protocols, MPC is now better equipped to manage utilization and costs for oncology, and ultimately align quality oncology care with appropriate reimbursement.

## RESULTS

Eviti Connect has exceeded expectations with its ability to assure quality, appropriate care and care payment with a focus on payer and provider alignment. MPC cited the following benefits of Eviti Connect:

- Enables high-quality oncology care
- Assures of appropriate payment for care
- Integrates medical policies seamlessly
- Confirms members are receiving appropriate care
- Rated Eviti Connect's quality and breadth of clinical library, integration of medical policy, alignment of providers and payers, and overall ease of use as "Best in Class"

After fully integrating NantHealth's Eviti Connect into its organization's workflow, **MPC has reported a 10:1 return on investment.** According to Mary Barone-Leitch, VP of Medical & Quality Management at MPC, "The Eviti approach is to consider the total plan. This comprehensive approach results in better outcomes for our members."

The Eviti approach is to consider the total plan. This comprehensive approach results in better outcomes for our members.

— Mary Barone-Leitch,  
VP of Medical & Quality Management at MPC
